Learning mysteries unveiled eliminating guesswork in education

“Everybody is a genius. But if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid”
Albert Einstein

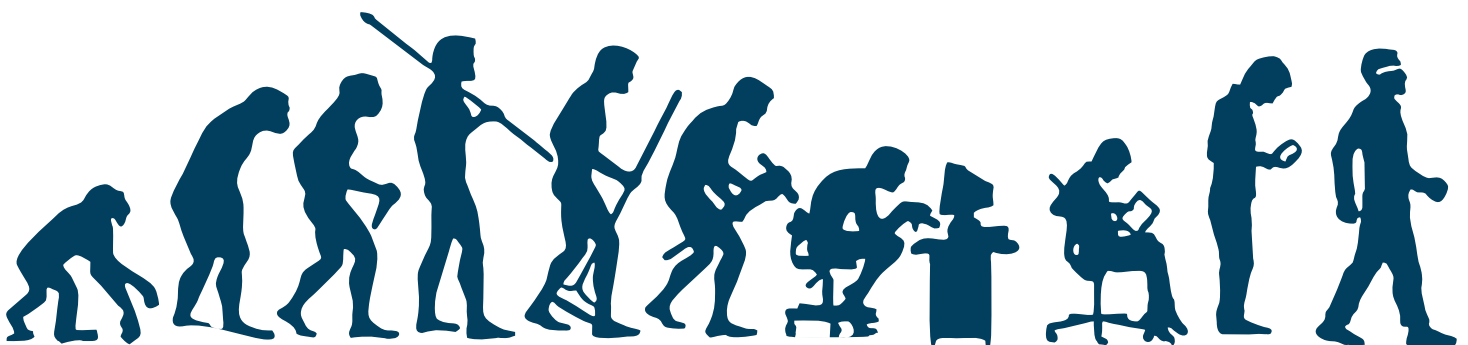

Cognitive Programming Technology (CPT)

COGNITIVE: Cognition is the science behind entire thinking process that include all the factors when we try to understand behaviours and attitudes manifesting from our brain. These factors include as IQ, CQ, Focus, Decision Making, Learning Styles, self-estimation and abilities etc. If body is considered as the hardware than cognition is the software which works absolutely on the similar functionalities. These factors are like those different apps we use in our computer for different objectives. The better these apps are equipped with, the easy it becomes to achieve the objective. Human cognitive factors too can be enhanced, reprogrammed, reordered to the desired levels as per our requirements.

PROGRAMMING: Programming of Brain is the outcome of a series of actions on certain perceptions with logical reasoning in a sequence given to the brain. This path (REPEATED ACTIONS) of patterns (NEURONS) running in the brain automatically brings the desired behaviours (COGNITIVE FACTORS) which we aim for. The functioning of these patterns known as cognitive factors, designs the level of human intelligence. A brain given programming (PERSONALISED TRAINING) on its natural ability (PASSION) will function at its 100% capacities and will achieve the status of excellence (GENIUS) in career (PROFESSION).

TECHNOLOGY: It is the collection of techniques, skills, methods and processes used in the accomplishment of objectives. Programming of Human Intelligence or reordering of Cognitive Factors through personalized training and education with the help of specialized trainers and mentors is a new and latest direction for social transformation.

Talent has no limit... We optimize human potential resulting a better world

cognosis

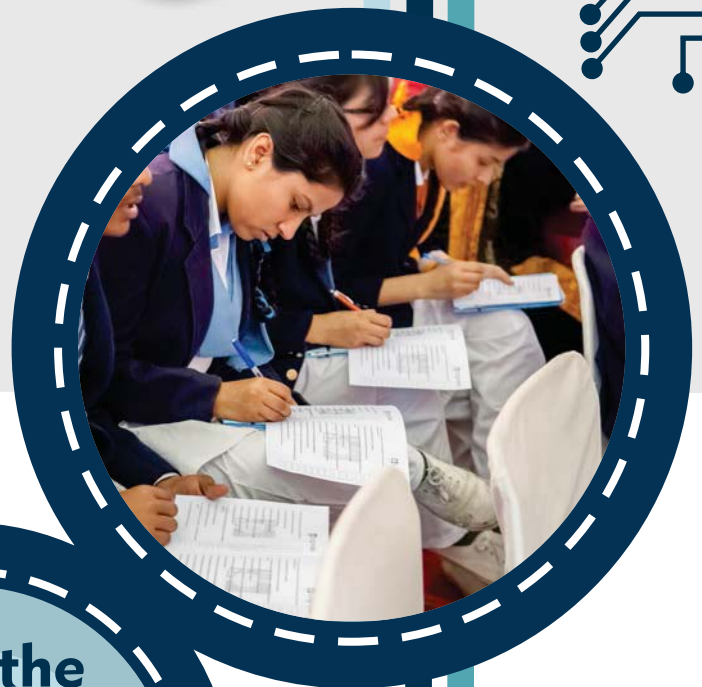

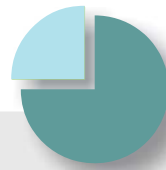

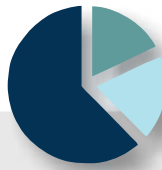

Cognosis is an Assessment Process to make educational learning simpler.

If human brain is a computer then Factors related with Human Intelligence are apps in the brain. Working of these apps can efficiently bring 100% output from the brain.

Cognosis helps in analysing the efficiency of these factors scientifically. Once you identify your potential, to optimize it, is then a process.

Cognosis Factors

1. IQ - Intelligence Quotient
2. Focus Factor
3. CQ - Creative Quotient
4. DMA - Decision Making Ability
5. Cognitive Gaps
6. Cognitive Capacity
7. Learning Pace
8. Short Term Memory
9. Analytical Thinking
10. Mathematical Ability
11. Emotional Intelligence
12. Thinking Style
13. Skill Sets
14. Self Estimation Level
15. Perceived Stress Level
16. Multiple Intelligence/
Learning Styles

Profession

Protralysis is an initiative to fill the gap between inefficiency and efficiency by providing world class solutions in order to help individuals grow scientifically, by focusing on their learning abilities.

Protralysis offers world class efficiency building & leadership development solutions to train people and make them capable to be focused, see with clarity, cultivate creativity and embody compassion. At Cognowledge we understand that there are innate capacities of our mind that can be trained to make us more resilient, flexible and stronger. With simple steps, you can transform yourself, your organization and your community.

Program 'COLUMBUS' is designed for the age group 18-23 years of college students & Program 'NAPOLEON' is designed for corporate employees. It's all about adopting a scientific process for enhancing cognitive capacities.

"The best brains of the nation may be found on the last benches of the classroom."
Dr. APJ Abdul Kalam

Building a great
career is like
promising the

World's Latest Training Program To Enhance Innovative Skills in Children

Based on the theory of Dr. Howard Gardner,
Prof. Univ of Harvard. USA

One year, once a week for 2 hours, training program for age 7-11 and 11-16

1. A-Class is a scientifically designed annual training based contact program for children.
2. It is based on Cognitive Programming Technology, implemented once a week.
3. It helps develop innovation, creativity, logic, reasoning and problem solving abilities in children.
4. It helps students transform their natural ability into great careers.
5. It develops natural inclination towards academics.
6. This technology plays a decisive role in shaping up their career & will help them attain meaningful goals in life.
